## HEAT MANAGEMENT

JBC stations intelligently manage the tool temperature and it helps to extend the tip life:

**Work mode:** Lift tool from the stand and the tool tip heats up to the selected temperature.

**Sleep mode:** When the tool is in the stand, the temperature reduces (preset sleep temperature is 180°C / 360°F).

**Hibernation mode:** After longer periods of inactivity (pre-set to 30 minutes), the power is cut off and the tool cools down to room temperature.

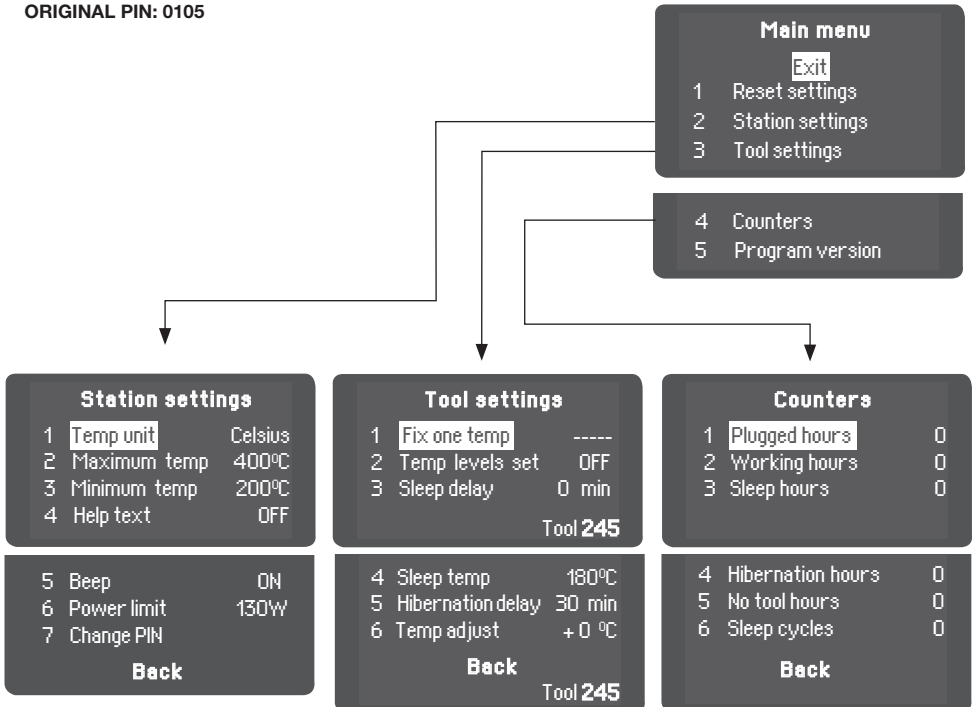

*Heat management increase tip life which reduces cost of ownership.*
